Summary

Highly motivated and passionate computer science undergraduate seeking opportunities in the real world to showcase my talents. Bringing an engineering perspective and creative problem solving approach to create products and experiences people love. A confident person who possesses the capabilities of being responsible and engendering innovative ideas.

Education

Informatics Institute of Technology | Present
(Affiliated with University of Westminster, London)

- BSc (Hons) Computer Science

HOLY FAMILY CONVENT | Jan 2007 - Oct 2020

- GCE (A/L) Examination in Physical Science Stream - B 2C
- GCE (O/L) Examination - 9A

PROJECTS

Aura Fashion App | React Native, Django

- Created a fashion app integrating personalized recommendations, social interactions, and multi-vendor shopping experiences. Utilized React Native for frontend, TensorFlow for machine learning, and Django for backend development.

Modern Real Estate Marketplace | MERN Stack

- Created a MERN stack real estate marketplace with advanced authentication (JWT, Firebase, Google OAuth), CRUD operations, enhanced UX, advanced search, and seamless deployment on 'render'

Estate Agent Client-side Web Application | React

- Designed and developed a client-side web application for estate agents using HTML, CSS, and JavaScript. Ensured seamless user experience and intuitive interface design.

Online Shopping System | Java, Swing

- Implemented a comprehensive online shopping system with both console and graphical user interfaces, utilizing object-oriented programming principles.

Ella Tourism web application

- Designed and developed a dynamic web application for tourism in Ella using HTML, CSS, JavaScript, and incorporating designs created in Figma.
